

Don't waste your time with anything but OE.

Delphi understands that your time is valuable. To prove it, we've spent our time over the last 50 years pushing the boundaries of HVAC technology, designing and manufacturing OE parts made for the real world. In fact, Delphi compressors are constructed with high-quality corrosion resistant aluminum alloys and dense nylon-based plastics not often found in aftermarket products. All Delphi compressors are 100% leak tested and are an exact fit, resulting in easier installation and fewer comebacks. And, sealing washers are included with Delphi compressors, which will save you precious time. To learn more, visit [www.delphi.com/am](http://www.delphi.com/am) or call **877-GO-DELPHI**.
