

MECHANICAL

Bay-master

www.bay-master.com

Low Cost – High Performance! Multi-company Quick Books interface; phone app scans the VIN, creates tickets and links your mechanic's diagnostics directly into the ticket; text estimates with virtual vehicle videos; Quick Lube not only selects, but even charges for additional oil, premium filters, etc.; Quick Quotes and PM Schedule looks up your aftermarket parts, showing savings compared to dealer pricing, and even connects to your tire distributor. Call (800) 922-2378 to get your FREE demo!

MasterLink Software

www.masterlinksoftware.com

MasterLink Software is a client-driven solution provider for the automotive repair industry. We combine the latest management technology with the most successful business practices used by our customers. We provide personalized service and focus on the needs expressed by our clients. Our software is enhanced and refined continuously based on the direct stream of input from experienced managers and owners. We provide phone, email and online support with regular updates and immediate problem resolution.

Mitchell 1

www.mitchell1.com

Mitchell 1's Manager™ SE is the industry standard for mechanical shop management. With the largest choice of

electronic parts catalogs (including tires), an interactive Work-in-Progress dashboard and over 180 integrated

reports, Manager SE provides a 360-degree view of the entire operation so shops can manage every aspect of their business, customer service and repairs more efficiently. Regular automatic Internet updates, data protection and a discussion forum provide an exceptional level of confidence, convenience and community.

Pace Software

www.pacecomputer.com

YES Management System has been in business for more than 25 years. YES is a full-featured point-of-sale system that includes invoicing, scheduling, online ordering, and inventory tracking at all levels. Time clock functions, marketing, accounting and customer loyalty systems are also available. YES shows you what's happening at your shop so you can manage your technicians and your workflow. YES can handle a variety of shops, from one-man shops to large companies with multiple locations.

Progressive Automotive Systems

www.rowriter.com

R.O. Writer Shop Management Software helps Automotive Repair and Tire Shops work smarter and faster. Features include Smart eCat, which checks part pricing and availability for 10 suppliers in 10 seconds, all at the same time. Other features: Scheduling, AP, AR, inventory control, marketing, multi-store solutions and more. Plus: the R.O. Touch mobile app that connects owners, service writers, and technicians via mobile technology.
